④

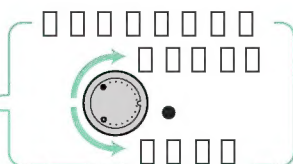

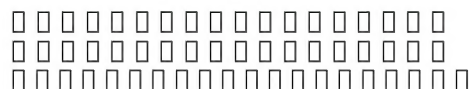

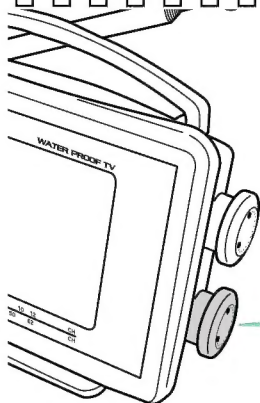

-
- The figure consists of three dot plots arranged vertically, each representing the distribution of the number of children per family for a different group. Each plot has a horizontal axis labeled 'Number of children per family' with values from 0 to 10. The vertical axis has three categories: 'Number of children per family', 'Number of families', and 'Frequency'. The first plot (top) shows a distribution with a peak at 2 children. The second plot (middle) shows a distribution with a peak at 3 children. The third plot (bottom) shows a distribution with a peak at 4 children.
